

To get yourself acquainted with the task at hand read the following documents:

- **Shred Packer documentation** - This contains most of the information you need.
- **ZLX feasibility report** - This was a report completed on the 22nd of September 2022. In this you will find an analysis of a previous iteration of the Shred-Packer. It will help you understand some of the decisions that were made.
- **Shred Packer Leaflet** – This was last updated on the 17th of August 2022 so is quite out of date. The idea is still the same and this will help you understand underlying concepts and assist you in making an updated leaflet when the time comes. **Tips:** The layout was made on Canva, Photorealistic images were made using Solidworks PhotoView 360, Layered images (to show movement) were made using solid works screenshots and Inkscape.
